Cherishy's Legal Reality

Law of Jamescilla: Positing, Negating and the Other are the candidates of scientific examination.

Deriving and understanding realities such as elements, eternal body, and relief depend on the scientific conclusions of distinguishability. Because no one understands the secret while distinguishably not understanding.

Therefore the question (what is Cherishy's Legal Reality…?) pulls in all attention.

Law of Davsínon: Indistinguishability cannot examine its own distinguishability from misunderstanding.

Therefore Negating is not Posit, Other is other than Posit, now.

Law of Geneon: The Other cannot be a Posit or Negate.

But the Other cannot separate without another category in between regressively, or else there is no separation happening.

Because regression is endless, cannot end a category, and the lack of regress cannot distinguish the Other from Posit and Negate;

Therefore the Other disappears now.

Law of Nanopia: Negation either:

Negates itself—implying true Non-Negativity;

Or it Negates the Negating of itself—implying boundless Non-Negativity;

Or Posits itself—also implying absolute Non-Negativity;

Therefore Negation cannot be itself, and Posit is proven.

Law of Vanality: The Posit may be limited or unlimited.

If limited, then the outer Posit is Negated, but Negation violates the Law of Nanopia, so Negation is rejected.

Therefore Posit is unlimited.

Law of Petrice: Unlimited Posit may be changing or unchanging.

Negating change violates the Law of Nanopia.

Therefore Posit is changing.

Law of Kekasmai: The unlimited, changing Posit is knowable or unknowable.

Knowing unlimited reality Negates unique knowers, but Negation violates the Law of Nanopia.

Therefore Posit is the unknowing in which all Posits are real as relative, boundaryless souls, who express—but are not completed with—prosciousness: the felt presence of knowing awareness.

Law of Mairuin: Hell, as Negation of Heaven, is not legally recognized in reality, even if it is systematized as real in indistinguishability souls. Mairuin derives and understands *Love* as purpose and need to fulfill because the Laws of Nanopia and Kekasmai, combinding, Posit instead of Negate Love.

Whereas the *worst* distinctions are legally recognized, despite Mairuin's rejection of Hell, and recognition of truth as Love;

Therefore equalizing best and worst moral fulfillments and needs is impossible, because one would have to negate distinctions.

Law of Fyrin: Elements are the basic qualities of awareness, building-blocks of any given relative soul or absolute reality, and come morally bound to best and worst, right and wrong, legal and illegal.

The best, right, and legal are alignments with Love defined, known, and implemented gradually by deriving, understanding, and promoting all trusted scientific, philosophic and holistic practices.

Therefore the worst, wrong, and illegal are reduced by lawful discovery of protective picking power, medicine made mandate, strong trained workers, teaching all the path and goal, music, art, styles, quests, heart-heaven breaks, unlocks, movements, and all known ways of Love now.
